## NEW CHURCH DEDICATED

Large Crowds Assembled at All-Day Services in New House of Worship—All Financial Obligations Provided For

Last Sunday marked the beginning of a new era for Methodism in this community when the beautiful new building was dedicated to the worship of the Lord. When the erection of a new church was suggested last spring hardly anybody thought such a thing possible, but today, as the result of the untiring efforts of the local pastor, the Rev. John F. Wilson, and the unanimous co-operation of the membership, we now have a building and property that is a credit to the community. It is a further satisfaction to note that every dollar of the indebtedness is provided for.

The program as printed, in last week's paper was carried out in full.

### W. C. T. U. Notes

The W. C. T. U. held their regular meeting on Wednesday afternoon at the home of Mrs. Gilman with sixteen members present. After the business meeting Mrs. Scovell, the National Secretary of School and College work, was introduced and gave a pleasing address, emphasizing the need of work among our young people along temperance lines and urging the W. C. T. U. to push this work. Mrs. Scovell lectured in the Congregational Church Wednesday evening.

Because of the storm, but few people attended the admirable lecture at the Congregational Church on Wednesday evening. The theme related, largely, to the injustice of the taxes laid upon the public as the direct and indirect result of the liquor traffic. Mrs. Bessie Laythe Scovell is an easy speaker; never hesitating for the right word, and embellishing her lectures with a fund of interesting facts, anecdotes and incidents, in a most entertaining manner. Those who did not attend missed a real treat. We hope Mrs. Scovell may come to Campbell again and that she may then be greeted by the large audience her talents deserve.

### The Editor's Troubles

The editor wishes to thank the friends who have sent in contributions for this week's issue of the Press. Without this aid we would hardly have been able to get out a paper this week. As the result of over-worked eyes, the editor has suffered not a little for several years and more than usual in the last two weeks. The oculists can give us no hope of a recovery without getting away from the business entirely. We have been in Campbell now about two years. In that time we have built up the business from a one-man to a three-man shop. Could we personally hold up our end of the work we would have a splendid business and be a fixture in Campbell. Before we retire from the work we hope to put a much more efficient man in the sanctum sanctorum.

### Miss Matie Sawyer Entertains Class of 1910

The members of the Class of 1910 of Campbell Union High School held a reunion at the home of Miss Matie Sawyer last Friday evening, and out of a class of 19 there were 14 present. A large part of the evening was passed in talking over old times and telling experiences met with since their graduation. One of the games that caused much fun was the making of short histories of the different members of the class. At a late hour the young folks repaired to the dining-room, where they enjoyed a tamale supper.

### Congregational Church

Next Sunday morning the theme will be: "The Imperial Service," preceded by a five minute talk to the boys and girls on "the true story of the wreck of one of our famous American Clippers." C. E. topic: "Winning Young People." Frank Nelson, leader. The theme for the evening service—7:30—is, "Palm tree Lives."

All are most cordially invited to worship with us. If you are looking for a Church home. Come we can help you. If you are looking for work to do. Come you can help us.

GEO. E. ATKINSON, Pastor.

### Methodist Services

The Rev. and Mrs. J. F. Wilson were in San Francisco this week taking a little rest from local activities and attending the Gipsy Smith meetings. Services at the Church will be as usual next Sunday.

### White Slave Traffic—Don't Miss It!

J. C. Westenberg of San Francisco will deliver a stereoscopic lecture Tuesday evening, Jan. 16, at the Congregational Church on the "White Slave Traffic."

This thrilling lecture is being delivered throughout the state and never fails to draw a full house. Tickets 25 cents, children 15 cents, on sale at Whitman's and at the door.

## Local and Personal

C. B. Miracle recently purchased the building occupied by the Crisp & Marshman blacksmith shop.

Mr. and Mrs. L. C. Watson went to Monrovia, near Los Angeles, yesterday for a visit of two weeks.

Let Golden West Cleaning and Dyeing Co. do your work for you. Putnam's are their agents in Campbell.

Our auto enthusiasts should read the Scientific American for January 6th. It is the Annual Motor Number.

LOST in Campbell a five dollar gold piece. Finder will please leave at the Press Office and receive reward.

Mrs. A. J. Vogt and little son returned Tuesday evening after several weeks visiting with relatives in the north.

LOST—A bunch of four brass keys on a string. Finder will leave at the Press office and receive liberal reward.

A large number of the young folks of the Christian Endeavor Society enjoyed a social at the church last Friday evening.

The members of the Philosophia Literary Society were entertained at the home of Miss Catherine Cooper last Friday evening.

Mrs. H. M. Parker was taken suddenly ill last Friday night and has since been confined to her bed. She is slowly improving.

Mr. and Mrs. A. G. Williams went to Los Angeles yesterday on the Counties Committee excursion. They will be gone for two weeks.

Miss Minnie Neff left Thursday for Los Angeles for a two weeks' visit with her mother and grandmother. Mrs. Neff is expected to return home with her.

Mr. and Mrs. L. J. Cox were in town Wednesday calling on friends. They enjoying their residence at Santa Cruz and Mrs. Cox is greatly improved in health.

Miss Vineyard was compelled to be absent from her school duties for several days because of a severe attack of poison oak. Mrs. J. H. Graves conducted classes during her absence.

Rev. George Atkinson received from Turkistan a white arctic fox skin and the skin of a cheta, the animal used by the Royalty of India for hunting purposes, sent to him by his brother, Dr. H. H. Atkinson who is a physician in a large hospital at Hart Port, Turkey. Rev. Atkinson will use these skins in illustrating his talk to children Sunday morning, Jan. 21.

Ruth, the little daughter of Mr. and Mrs. E. S. Brown, was taken violently ill last Saturday and it was feared at first that she had swallowed something that had lodged in the throat. The baby was taken to Los Gatos where Dr. Chamberlain attended her, and it was found that her suffering was probably the result of something she had been eating.

### Notice

The Annual meeting of the stockholders of the Odd Fellows Hall Association will be held at the I. O. O. F Hall, Campbell, Monday, January 15th at 7:30 p. m.

W. CARNEY, President.  
C. BERRY, Secretary.

### Committees Appointed

The following committees have been appointed to have charge of the various activities relative to Old Settlers' Day celebration on the 22d of February:

Chairman of committees: Warren Shelley.

Finance: Judge Farley and John F. Duncan.

Music: R. R. Rucker.

Tables: Pearley Paine.

Decorations: Women's Club.

Program: Professor Snow.

Reception: S. G. Rodeck.

Advertising: B. O. Curry.

Hall: Tom Mendel.

Speaker: Rev. Atkinson, Professor Smith and J. E. Palmer.

Chairman of Meeting: Rev. John F. Wilson.

### Christian Science Services

In Odd Fellows' Hall every Sunday morning at 11 o'clock. Subject for January 14.—Sacrament. Sunday School at 12:15. The public is cordially invited.

## Mrs. Dwight V. Ross

Teacher of Pianoforte.

Those who wish to arrange for lessons may meet her at the home of Mrs. E. W. Smith, opposite the High School, Tuesday or Friday afternoons.

## F. & A. M. Install Officers For 1912

The stated meeting of Charity Lodge, F. & A. M. was held on Monday evening, the 8th inst.

After the usual routine business was disposed of the Lodge under the direction of District Inspector J. P. Jarman, as Installing officer, and P. S. Williams, as Master of Ceremonies proceeded with the installation of the following officers:— L. D. Bohnett, W. M.; J. F. Duncan, S. W.; C. H. Whitman, J. W.; S. R. Wade, Treasurer; James Fablinger, Secretary; S. A. Moulton, Chaplain; George Whitney, Marshal; Irving W. Snow, S. D.; Charles Berry, J. D.; Charles E. De Selle, S. S.; F. O. Putnam, J. S.; Charles Townsend, Tyler.

At the close of the ceremonies Bro. Wade on behalf of the brethren of the Lodge in a very happy way presented Bro. Whitney, the retiring master with an elegant past Master's Jewel!

Brother S. A. Moulton who is a Mason of more than fifty years standing, and who has been the faithful and zealous Chaplain of Charity Lodge from the date of its organization, through Bro. C. H. Whitman, in a felicitous speech presented the Lodge with an elegantly bound collection of addresses and original poems delivered at the various meetings and social gatherings of the Lodge during the entire time of its existence.

This volume was collected and prepared at considerable cost and labor on the part of Brother Moulton and was by him presented to be preserved in the archives of the lodge.

The members of the lodge sincerely appreciate this labor of love on the part of Brother Moulton, together with all his other labor of love for the lodge and its members and for Free Masonry in general.

## The Question of Glasses

Are they needed or not?

The question is easily answered by those who can't see well without them but for a great many who see well and still suffer from the effect of eye-strain it can only be decided after a careful examination. Such an examination I am prepared to give you, and an honest opinion as to what is needed. No operation. No drugs. No glasses unless necessary.

## HER ONE ANTIQUE ORNAMENT

Weary Woman Clerk In Search of Art Treasures the Sleeping Form of Lazy Husband.

He was employed by a city firm of dealers in bric-a-brac and old furniture to scour rural districts in search of antiques, and suddenly he espied an old-fashioned cottage nestling at the foot of a hill. Surely here, in this old-world spot, there would be something in his line.

He knocked smartly at the door, and a weary looking woman answered.

"Do you happen to have any antique furniture, madam?" he inquired. "Or any old ornaments, such as heathen idols, or similar things?"

The woman looked puzzled for a moment.

"I think I've got one," she said, at length.

Agog with expectation, he followed her into the house, and to a room where lay a hulking fellow who was fast asleep on a couch.

"Where is the article, madam?" queried the searcher after the beautiful.

"There it is," she replied, pointing to the couch. "He's the only thing I've got in the place—hasn't done any work for years. But perhaps he won't do for you; he's certainly no ornament."

## An Elopement Fifty Years Ago.

Married in La Crosse fifty years ago, the culmination of a pioneer day romance of the sort that is read about in fiction, Mr. and Mrs. R. E. Dougherty celebrated their golden wedding anniversary at their home at Rodeo, N. M.

But one witness of the marriage is alive, and he James W. Young of La Crosse, told the story of the wedding, which follows:

"William Dougherty was born in Vermillion county, Ind., and so was his wife, whose maiden name was Mary Catherine Hiller. It seems that at the time of the wedding the girl's parents objected to the young man's attentions, which made it necessary for several other young fellows and myself to help the prospective bridegroom out of the difficulty.

"We got a skiff and rowed up the river to the girl's house, where we quietly got her out of the house and into the boat. We then rowed down through French Slough and up to the north side where Mr. Dougherty was waiting for us. We soon had Justice of the Peace Winston on the scene and the necessary ceremony was performed."—La Crosse correspondence St. Paul Dispatch.

## The Man They Admired.

Several senate clerks and stenographers were gossiping in the Capitol building the other day, telling reminiscences of statesmen past and present, when Senator Cummins of Iowa passed them. "Ah, there's the best of all of them," one remarked. "Right you are," asserted another. "Foraker was great, but, in some respects, this man even surpasses him." "I doubt if this old building ever forgets his memory," sighed a third. "Wonderful in debate!" was the fourth man's contribution. "No man was ever his equal in the hall of a hot fight on the floor." A stranger had listened to the praises, following Senator Cummins with his eyes as long as he could. "Who is he?" he asked eagerly. "Some famous orator? The country's leading statesman, perhaps? A political genius?" "Genius nothing!" grunted one of the stenographers. "Why that man's the slowest talker of the senate and the easiest to take in shorthand!"

## Method in Madness.

Pat Sullivan was a soldier and a good fellow; but in the opinion of officers and men alike he was certainly suffering from some brain affliction, and when on duty or at drill he would suddenly break from the ranks and run after an imaginary bit of paper, visible to no one but himself, shouting as he did so:

"There it goes! There's the paper!"

This at length became so frequent an occurrence that, on the matter being brought before the medical authorities, he was declared to be suffering from a slight attack of insanity, and in consequence he was given his discharge. When leaving, however, he gave evident proof that there was some method in his madness, for as he quitted the service for ever he cried, flourishing his discharge paper: "Faith, boys, sure I've got the piece of paper I've been running after this long time!"

## Bees Broke Up Church Services.

A unique occurrence broke up the service in the German Lutheran church at Chicago the other Sunday. A swarm of honey bees invaded the building and drove out the pastor and congregation, and services had to be held on the lawn in front of the church.

## Men.

All men are born lazy, but in some of them the sense of shame is strong enough to overcome it.—Chicago Record-Herald.

## Beauty.

Beauty soon grows familiar to the lover, falls in his eye and palls upon the sense.—Addison.

## WOOD FROM WASTE PAPER

Ohio Inventor Claims to Have Perfect Machine Which Will Accomplish Just That Purpose.

There is an old saw to the effect that

"Nature works in circles, Every one agrees; Trees grow out of doors, Doors are made from trees." Some one with a gift for rhyming may add another verse about paper being made from wood and wood now being made out of old paper. An Ohio inventor, Oliver R. Barber, has perfected a machine which does this. He takes old newspapers and straw and puts them through his machine and they emerge in the shape of artificial boards of any desired length or thickness suitable for building material, for railroad ties or for furniture.

For many years the ever-increasing demand for white paper for newspaper printing has been making serious inroads on the available forests of this country and Canada, and the problem of where to find timber to meet the demand has been growing more and more menacing. This also applies to wood needed for building construction, furniture and railroad ties.

Turn about is fair play, so today the old newspapers are being converted back again into wood which is claimed to be even more suitable for many purposes than natural lumber. Specimens of the new artificial wood that have already been made out of old newspapers and straw vary in thickness from an eighth of an inch upward, and range from narrow molding to boards four feet wide and twelve feet long. The inventor claims that it can be impregnated with certain chemicals to render it fireproof, can be made waterproof, can be permeated with any desired color during the manufacture, or can be given a highly polished surface finish. He further asserts that it is susceptible to all kinds of tool treatment, is free from knots and shakes, with their frequent waste, and it can also be used in embossing.

## BADLY AFFECT THE HEALTH

Serious Ailments Have Been Proved to Be Direct Result of Labor in Household.

One possible explanation of the reason why cooks, housemaids and other domestic servants are not, as a class, the healthiest on earth, is offered by the Vienna correspondent of the Journal of the American Medical Association. He reports that a union of household servants is being formed in Austria. One of the earliest results of the movement has been the gathering of valuable and interesting information regarding the susceptibility of houseworkers to ailments which others seem able to avoid.

Cooks, it has been discovered, suffer from gastric disorders because of the too frequent tasting of the foods they are preparing. Anemia is readily explained by the long stay in badly ventilated rooms and the rare walks in fresh air, as well as my the insufficient amount of sleep. Rheumatic affections are very common among servants, partly on account of the frequent exposure to cold and bad weather, with insufficient protection, partly from working in unheated kitchens, washing kitchens and sculleries. A frequent complaint of household servants is static flat foot with varicose veins, while a great proportion of housemaids suffer from nervous diseases and neurasthenia, or hysteria.

The Austrian union of household servants is seeking to improve the conditions under which its members are employed in order to reduce the percentage of ailments to a minimum.

## BEETLE MUSHROOM FARMER

Scientific Investigation Has Shown That Insect Possesses High Order of Intelligence.

Scientists have known of mushroom-growing ants for a long time, and it was generally believed that the ant was the only insect possessing sufficient intelligence to make a successful mushroom farmer. Prof. J. Bouvier, the French entomologist, has found that a certain wood-boring beetle known as the Bostrychide is as familiar with mushroom cultivation for home consumption as the ant.

Prof. Bouvier discovered that the beetles bore holes in wood and half fill them with a prepared fungus which makes an ideal mushroom bed. The garden is carefully spawmed and tended and in course of time the mushrooms appear. In this way the beetle provides itself with a food sufficient to tender for its feeble jaws.

## His Squaw's Necklet

By IZOLA FORRESTER

(Copyright, 1911, by Associated Literary Press.)

Vivien reined in her pony at sight of the major. He was visibly disturbed. She could see that from his troubled, uneasy gaze as he watched the stumbling, ungainly figure of old Broken Bow pass down the road that led from the post to the reservation.

"Now what?" called Vivien, anxiously. "Aren't you going to ride this glorious morning—with me?"

He came up to the pony, and stroked its velvet nose gently.

"I cannot, dear, this morning. There's trouble over at the camp. Broken Bow tells me that their medicine man has lost his squaw's necklet."

"Lost what?" laughed Vivien. "How interesting!"

"It may become more so. They are very superstitious, and most abominably obstinate over these things. It is a necklet of elk teeth and eagle claws, a sacred affair that has been handed down from chief to chief for generations, and is supposed to convey miraculous powers to its possessor. The last chief had no son, therefore his daughter kept it, and married the medicine man."

"And he—"

"Thereby acquired part of the gift. Broken Bow has been trying to explain it to me. The whole tribe is up in arms over it. It is believed that the woman's cousin, a young brave named Flying Fox, has stolen it, and will rally the tribe against the peaceful rule of old Broken Bow."

"Aren't they just like children?"

"Hardly. More like frightened animals that rush panic-stricken into unknown danger. This foolish necklet affair may bring on a tribal war, and already the colonel has ordered me out to settle it, with force if need be."

"And you cannot ride?"

"No. Best not venture far yourself."

Vivien laughed back at him over her shoulder as she let the pony go. Danger? There was no danger, she was sure.

Straight away from the post she rode, choosing the river road as her favorite. The post lay in the valley, and she loved the trails that led over the far-lying buttes up to the purple reaches of the foothills. Mile after

"The truce ends at sundown, colonel," he shouted.

"It is not sundown yet, my boy," said the old man, and he led the way into the tent where Broken Bow waited, with the medicine man and his wife and the old men of the tribe. The chief returned the colonel's salutation gravely.

"It is too late," he said; "I have no power to quell them. Flying Fox has been acclaimed their chief, and rides to light the signal fires to call the other tribes. I have no power now."

A long high wall came from the medicine man, and his wife looked at Vivien, as one woman stares at another she has never seen. Suddenly she gave a shriek and sprang at the girl, tearing at the necklet that rested about her throat. Vivien threw off the clinging hands, and held the necklet high above her head out of reach to the hands of Broken Bow.

"The white squaw holds the balance of power in her hands," said the old chief. "Send messengers to say we have the necklet, and the gift returns to our side, not Flying Fox's."

Suddenly Vivien heard a low gasp behind her, and turned to find the girl who had hidden the necklet at the spring. She caught her wrist, and held fast, as she called to the major what she knew of her.

"It is Evening Star," said Broken Bow, sternly, "my own daughter. She had stolen the necklet for him, to give him victory. What shall her punishment be at the hands of the great white father?" He looked at the old colonel, and the colonel looked at Vivien, standing beside the major. And Vivien, reading the look in the Indian girl's eyes, gave sentence.

"Let her be banished with Flying Fox to the North country."

"Thou hast said," replied Broken Bow, but the girl smiled back at Vivien as they led her forth to her exile, and understood.

Her Moths Were 'Planes.

"I had the strangest experience the other morning while I was out at Garden City spending the week end with a friend," said a New York girl to her chum. "I was lying in bed and in a half sleepy condition was looking out of the window at my side. I kept seeing what I thought were moths, and then gradually as I wakened up more fully I realized that I could hear a buzzing noise such as I had heard the locusts make this spring over in Jersey. Realizing that it was too late for locusts, I set up and rubbed my eyes, when to my great surprise the moths had grown so large that in an instant I was brought to my senses and knew that they were monoplane and various other airships. The home of my friend is near the new aerodrome in Nassau Boulevard, and my hostess informed me that they were awakened on almost every pleasant morning by the buzzing of the birdmen's engines."

Understands About Engines.

Miss Georgia M. Martin is probably the only woman in the world who is chief clerk in the office of a master mechanic of a big railroad. She occupies that position under Thomas J. Cutler, master mechanic of the Northern Pacific Railroad company at Spokane. When Mr. Cutler is away she has complete charge and understands the mechanism of an engine perfectly.

Next Year's Ducks.

Pick out the young ducks and drakes that grow and develop fastest, and that attain good size, for next season's breeders. Some ducks will be heavier at eight weeks than others are at ten, and are therefore more profitable.

Feed for Cow.

In a year the average dairy cow, producing in the neighborhood of 5,000 to 6,000 pounds of milk, requires about 5,800 pounds of roughage, 600 pounds of farm grains, 150 pounds of mill feed and 160 days on pasture.

Wood Ashes Benefit.

On average soils, fruits and vegetables are benefited by liberal applications of wood ashes, and remarkable results have been obtained by the use of ashes on legumen crops, especially clover and alfalfa.

Wood Ashes Benefit.

## CAREFUL TRAINING FOR COLT

Gentleness is Most Useful in Handling Young Animals—Little Fellows Soon Become Friendly.

The old expression, "breaking a colt," has gone out of fashion.

A good colt is worth careful training, which should commence before it is a month old, some say a year after the colt is foaled. By handling young colts in a kindly manner they soon learn to become friendly and they seem anxious to do what you want them to do.

The best breeders are very careful not to frighten a colt. The memories of colts are good; they never forget abuse. If a colt has a good disposition it can be coaxed to do almost anything wanted of it. Even fancy tricks may be taught to young animals, and they seem to enjoy the learning.

When they grow large enough to wear harness, they are all ready for business, and are all the better for doing a little light work when they are two years old. Right here, however, is where a great many colts are injured. Two-year-old colts lack the hardness of bone necessary to stand much of a strain, but they can pull the long end of a double-tree hitched to a light harrow for an hour or so with positive benefit and they seem to like it. When taken in from the field and given a little grain by way of reward they eat it with great relish.

The most valuable horses are taken in hand early in life, and carefully trained in this way. Even horses intended for the road are better for having a little experience in farm work when young.

Gentleness is the principal argument to use in training a colt. You cannot gain their confidence with rough treatment or boisterous language. Establish a bond of sympathy between yourself and the colt and he will try to do your bidding.

It is never best to put bits in the mouth of a colt until he is ten months or a year old, as his mouth is very tender and is liable to be injured. In training the colt to lead a halter should be used, and care should be taken to see that the halter does not fit too tightly about the head.

OLD HENS' CHICKS ARE BEST

Several Tests Prove That Offspring of Mature Stock More Thrifty and Vigorous.

Don't sell all your old hens. If you intend using eggs from your flock for hatching, you should keep a few old hens to furnish them. The resulting chicks will be stronger and heartier than if incubated from eggs laid by your spring pullets. The offspring of the more mature stock will also prove more thrifty and vigorous.

These facts were determined by several tests made at Morgantown, W. Va. Eggs from hens one, two and three years old were used. In every test the eggs from the older hens hatched out more, heavier and stronger chicks than did the eggs from the pullets. And the chicks did not lose this advantage in weight, for they were materially heavier at the end of forty days when the tests ended.

It was also determined that it is a matter of prime importance to have the hens not only mature but unexhausted by previous heavy laying, during the breeding season. Then the very best results will be obtained in respect to number, size and vigor of the chickens.

Composition of An Egg.

More than 65 per cent. of every egg is water. Water also makes up 55 per cent. of the hen's body. Unless a hen has water she cannot make eggs, nor can she properly digest her food. True, all foods contain some water. Vegetables contain a great deal, but all these sources will not be sufficient to more than supply the bodily wants. Much water is used in digesting the food and much passes off in breathing. Many a hen that is otherwise well fed fails to lay because she is compelled to go without water, or to accept the alternative—to suck it out of the snowbank. When laying freely a flock of fifty hens will drink from four to eight quarts of water each day.

Quality of Sows.

There is a great difference in the motherly qualities of sows, and when a breeder finds one which produces uniformly large litters and all fine, strong, healthy pigs, while she has a constant and large flow of milk for her offspring, he should keep her for breeding purposes, as long as she will breed well, and she will be found to be the most profitable animal on the farm.

Next Year's Ducks.

Pick out the young ducks and drakes that grow and develop fastest, and that attain good size, for next season's breeders. Some ducks will be heavier at eight weeks than others are at ten, and are therefore more profitable.

Feed for Cow.

In a year the average dairy cow, producing in the neighborhood of 5,000 to 6,000 pounds of milk, requires about 5,800 pounds of roughage, 600 pounds of farm grains, 150 pounds of mill feed and 160 days on pasture.

Wood Ashes Benefit.

On average soils, fruits and vegetables are benefited by liberal applications of wood ashes, and remarkable results have been obtained by the use of ashes on legumen crops, especially clover and alfalfa.

## CAP and BELLS

## HE WANTED ANOTHER WESKIT

Tramp Who Had Found Five-Pound Note in Cast-Off Garment Was Looking for More.

She remembered him quite clearly. He was the honest-faced tramp who had called some months ago, and who had so touched her that she gave him some of her husband's left-off clothing.

"Come inside, my poor man," she said warmly, "and I will give you a cup of nice hot tea and some cake."

"No, thank yer, mum," answered the tramp; "I don't want yer tea or yer cake. I've just called to tell yer, mum, that in one of the pockets of that weskit you gave me last summer, mum, I found a £5 note!"

"Good gracious!" exclaimed the astonished housewife. "And you mean to tell me, you good, honest man, that you have called to bring it back?"

"No, mum," answered the tramp; "not exactly, mum. I've called for another weskit."—Tid-Bits.

## Their Last Hour.

The lovely maiden shuddered involuntarily and drew closer to her lover. A look of unutterable sadness stole over her face and a teardrop, welling from her azure eye, stole down her nose and made a blister on the young man's clean white collar.

"Why are you so sad?" he murmured, sneezing, as her wayward tresses tickled his left nostril.

"I was thinking," she said, gulping down a sob and a marshmallow simultaneously, "that this will be our last evening together until tomorrow."

For, truly, love hands us a lime with every caramel.

## Family Council.

"What is your father going to do for amusement, now that he has retired with a fortune?"

"That is what worries us. We'd like to get him interested in something and would buy him a seat in the senate if we could be sure nobody would try to stir up an annoying scandal."

## Mysteries of the Toilet.

"Tell me," slyly asks the local gossip, "hasn't Mrs. Kittles got a skeleton in her closet?"

"No, mum," replies Mrs. Kittles' maid, "but she's got a world of things to put on under her clothes so's folks won't know she's nothin' but a skeleton herself."—Judge.

## THE REAL HEAD.

She—Man is the lord of creation. He—Woman is the power behind the throne.

## Unprofessional.

Crawford—This war between Italy and Turkey was rather sudden, wasn't it?

Crabshaw—I should say so. They started in before the moving picture men could arrive on the scene.—Judge.

## Terribly Businesslike.

"Homicide cases are becoming shockingly numerous."

"Yes," replied the drug manufacturer. "If this sort of thing goes on we'll be warranted in boosting the price of cyanide."

## Rare Reticence.

"There goes Miss Flouncer. She's a very remarkable girl."

"In what respect?"

"I had known her six months before she told me she had been abroad."

## Her Ambition.

"She certainly did fly high in her ambition."

"Did she succeed?"

"Sure. She married an aviator."

## Blood Humors

Commonly cause pimples, boils, hives, eczema or salt rheum or some other form of eruption; but sometimes they exist in the system, indicated by feelings of weakness, languor, loss of appetite, or general debility, without causing any breaking out.

They are expelled and the whole system is renovated, strengthened and toned by

## Hood's Sarsaparilla

Get it today in usual liquid form or chocolate tablets called Sarsatabs.

### The Servant Question.

It was a Kingston, Ontario, woman who recently sized up one feature of the servant girl question in a new way. She said: "I got a girl to relieve me of physical fatigue, and soon I got rid of her to relieve me of mental fatigue."

### Keeping Worms From Plants.

If air-slaked lime be used in earth in which plants are potted it will keep worms away.

## MEXICAN MUSTANG LINIMENT

### For Sprains and Bruises.

B. Street, Cedarville, Cal., writes: "Have used Mustang Liniment a number of years on stock for cuts, sprains, bruises, etc., with best results. The boys on the ranch here use it for rheumatism, lumbago, sprains, cuts and all the most satisfactory results. In fact we use it on man or beast as the best remedy we know of." 25c, 50c, \$1 a bottle at Drug & Gen'l Stores

### The Thin Red Line.

Robert Gibb's famous painting, "The Thin Red Line," represents an incident in the battle of Balaklava. At this memorable conflict, which was fought on October 25, 1854, a heavy body of Russian cavalry having driven the Turks like chaff before a whirlwind from their redoubts, dashed on in the direction of the town of Balaklava, but found the Ninety-third Highlanders, 500 strong, under the command of Sir Colin Campbell, in their way. Sir Colin rode along the ranks and said to his men: "Remember, there is no retreat from here, men; you must die where you stand." To which voices were heard answering cheerfully, "Aye, aye, Sir Colin, we'll do that." In a moment more the Russian squadrons were bearing down upon the Highlanders, who stood still to receive them, not in square, but in the ordinary British battle-line of "two-deep." The affair occupied a very few minutes. At long range a well-directed fire from the Ninety-third told with evident effect on the Russians, who, however, swept on, wheeling suddenly to the left with a purpose of taking the Highlanders in flank. But a quickly responsive movement of the Grenadier company of the Ninety-third, under Captain Ross, spoiled the attempt. The mighty wave of horsemen still came rolling on, when, at about a hundred yards' distance, the rifles descended with a flash below the feather bonnets, and a second volley rang forth, scattering death and confusion among the over-confident foe. The Russians wheeled to the left, and altogether forsook that part of the field.

### Scientific Management.

One cold winter day some railroad officials, while making an inspection of a large yard, stepped for a moment inside a switchman's shanty to get warm. Among them was a general superintendent who was known to have a mania for "scientific management," and the reduction of expenses. As they were leaving, the switchman asked the traveling yardmaster, whom he knew:

"Now, can ye be tellin' me who that man is?"

"That's the general superintendent," the yardmaster replied.

"What do you think o' that? He's a foiner lookin' mon, and ye never would believe the tales ye are after hearin' about 'im."

"What have you heard about him, Mike?" was the curious question.

"Why, they do say that he was at the funeral of Mr. Mitchell's wife, and when the six pallbearers come out he raised his hand and said: 'Hold on a minute, boys. I think yez can get along without two of thim.'—Every body's Magazine.

### Many Uses for Asbestos.

The development of the asbestos industry in Canada has led to a notable increase in the industrial applications of that material. It is now used for steam packing, cloth, rope and yarn making, furnace lining, boiler covering, building material and electrical insulation. About 30,000 tons of asbestos paper are used yearly for protection from fire. Employed for ceilings, together with wood or metal lathing, it is said to offer a positive barrier to the passage of fire from one floor to another. Material for roofs and light buildings is made by passing a sheet of annealed steel at a high temperature through a bath of cement compound, which appears to enter the grain of the metal, and then applying pure asbestos felt to both sides of the sheet by pressure between hot rollers. The resulting material resists fire, water, gas and sulphur fumes for an indefinite period, while possessing the strength, rigidity and lightness of sheet iron.

### An Amiable Pet.

The dog is the child's protector and companion. There was never a child which did not love a dog; there are few dogs who do not love children. No matter how violently he may be treated by his youthful companions, the dog takes it all in good part. He enters into the spirit of the game and seems to rejoice if he is able to be the occasion of youthful mirth and laughter.

### Latest Idea in Rope.

A company has patents covering a rope made of several strands of paper covered with galvanized steel wire. The rope thus produced is strong, tough and flexible, suitable for clothes lines and such uses. It is claimed that a rope of this kind will withstand the action of the weather 50 per cent. longer than cotton.

### Fallacious Doctrine.

We are only just beginning to recover from the fallacy imposed on us by our Puritan ancestors that what a child liked was bad for him. They held that life should be made as disagreeable as possible, and we had suffered for their doctrine.

### Test of Friendship.

He who betrays another's secret because he has quarreled with him was never worthy of the name of friend; a breach of kindness will not justify a breach of trust.

### History.

What is history but a registry of the successes and disappointments, the vices the follies, the quarrels, of those who engage in contention for power?—Paley.

### Talent and Genius.

The discovery of a truth by slow, progressive meditation is talent. Intuition of the truth, not preceded by perceptible meditation, is genius.

## You May Need It

Ask your doctor about the wisdom of your keeping Ayer's Cherry Pectoral in the house, ready for colds, coughs, croup, bronchitis. If he says it's all right, then get a bottle of it at once. Why not show a little foresight in such matters? Early treatment, early cure.

We publish our formulae. We banish alcohol from our medicines. We urge you to consult your doctor.

Many a boy is called dull and stupid, when the whole trouble is due to a lazy liver. We firmly believe your own doctor will tell you that an occasional dose of Ayer's Pills will do such boys a great deal of good. They keep the liver active.

Made by the J. C. Ayer Co., Lowell, Mass.

### Humor of the Wag.

"Yes, he's a very merry wag," says the Cleveland Plaindealer. "The last time he went to Mexico his wife asked him to bring back some of the embroidery work for which the country is famous. When he reached home he handed her a box containing a half dozen human teeth. 'Mercy,' she cried, 'What's this?' 'Mexican drawnwork,' he trippingly replied."

### Distemper

In all its forms, among all ages of horses and dogs, cured and others in the same stable prevented from having the disease with Spohn's Distemper Cure. Every bottle guaranteed. Over 500,000 bottles sold last year. \$50 and \$1.00. Good druggists, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

### Put Confidence in Nurse.

Very small experience of practice is needed to show that in serious illness the patient's friends generally ask the nurse if she thinks the doctor "really understands the case," and they are much influenced by her opinion and the manner in which she gives it.—London Hospital.

### To Break in New Shoes.

Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, aching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

### Untenable Ground.

"By the way, why do you permit your children to believe in fairies?" "I can't tell them there are no fairies and then expect them to believe in microbes."—Washington Herald.

You may have a Headache, Toothache, Stomachache, Earache, not serious enough for the doctor, so you suffer. Hamlin's Wizard Oil stops these pains quickly.

### Their Proper Place.

Curious Little Kate—Where do they put the moo-cows when they take 'em on the train? Wise Little Willie—On the chew-chew cars, stup!

### Piles Cured in 6 to 14 Days.

Your druggist will refund money if PAZO OINTMENT fails to cure any case of itching, Blind, Bleeding or Protruding Piles in 6 to 14 days. 50c.

### Sure Thing.

A scientist says that people would have more sense if they did not wear hats. Yes, and husbands would have more dollars.—Charleston News and Courier.

A merchant advertises because he wants your trade. He will make it worth your while to patronize him.

### The Glory of God.

Linnaeus once said of the unfolding of a blossom: "I saw God in His glory passing near me and bowed my head in worship."

### Hospitality.

Hospitality sometimes degenerates into profuseness, and ends in madness and folly.—Atterbury.

### The Ideal Woman.

Our ideal of what women ought to be is changing with dizzy rapidity.—Englishwoman.

### Signs of Gentility.

The practice observed among Spanish hidalgos, of allowing the finger-nails to grow into claws was to demonstrate that they had never done any manual work. The same custom exists among the Chinese for the same reason.

Among the Romans the wearing of long sleeves, which came down over the hand, was the fashion in aristocratic circles. This advertised to the world that the wearer did not engage in any labor, and freedom from employment was the condition of respectability.

English boots and shoes have been designed more or less for the same purpose as that of the Chinese, who bind their women's feet in proof of their gentility. As early as the time of William Rufus "peaked-toed boots and shoes" excited the wrath and contempt of the monkish historians. The shoes called pigacia had their points made like a scorpion's tail, and a courtier named Robert stuffed his out with tow, and caused them to curl round in the form of a ram's horn, a fashion which took mightily among the nobles. It is plain that the purpose of this fashion was to show that the privileged wearer was not dependent on any kind of labor or fleetness of foot for his daily bread.

### Speaking Through Brick Walls.

Remarkably successful experiments in transmitting the human voice over long distance with the aid of the natural elements alone has been made near Chestow, England, by a young scientist, Mr. Grindell Matthews. Having demonstrated to his own satisfaction the possibility of transmitting the human voice through all obstacles without the aid of wires, Mr. Matthews submitted his discovery to a severe test in the presence of a number of experts. He was placed in a strong room of a big London commercial house, and locked in, with nine inches of armor steel, nine inches of fire-brick, and six feet of concrete between him and the outer world. By means of his small portable apparatus he carried on a conversation with an operator in another room on the further side of the building. So distinct and faithful was the transmission that the experts in attendance were actually able to hear the tick of his watch, notwithstanding the almost impenetrable mass between the two instruments.

### Primitive Ideas of Hygiene.

Hindu ambassadors once sent to England by a native prince were regarded as so polluted that on their return to India nothing but being born again would purify them, and they were accordingly dragged through a gold image of the sacred Yoni.

A writer describes a curious custom of the Barete in South Africa. A doctor comes and makes an incision on the forehead of each of the survivors of his relatives and fills it with medicine to ward off the contagion and the effect of the sorcery that caused his death.

Leland calls attention to a custom of taking medicine on the threshold in ancient Tuscany, the idea being that the threshold was the border line between the outer world where evil spirits freely roam.

If a person dies within an Eskimo hut everything in the hut must be destroyed or thrown away as well as everything which had come into contact with the deceased.—Dietetic and Hygienic Gazette.

### Heat Belts Around the Earth.

It was commonly supposed for a long time that hot and cold belts of air which surround the earth at different seasons were only a few hundred feet thick. The aviators are substituting for this theory a new fact.

In one airship ascension made in the United States early in July, the thermometer marked 90 degrees Fahrenheit, as the ship sailed upward. This marking continued at that figure until the ship was 2,100 feet high when a cold belt of air was met and the thermometer dropped to 72 degrees Fahrenheit. At an ascension made in France in June the thermometer marked 88 degrees Fahrenheit, on the earth's surface, and retained this figure to an elevation of 1,000 feet, when it changed to 76 degrees Fahrenheit.

Here then were discovered one hot air belt nearly half a mile and another a fifth of a mile in thickness. Cold air belts have already been passed through 900 feet thick.

### For Bottles Marked Poison.

Put common pins in the corks of all bottles marked poison, sticking them into the bottom and allowing the points to protrude beyond the corks. After doing this you will never pick up such a bottle—even in the dark.—Woman's Home Companion.

### To Clean Enamel.

When the enamel becomes discolored, scour it with a damp flannel dipped in garden mold, then rinse it in plenty of water. In this way the cleaning is effected without causing scratches or other damage.

### If They Would Unite.

Men of wit, learning and virtue might strike out every offensive or unbecoming passage from plays.—Swift.

### Making the Gentleman.

Education begins the gentleman, but reading, good company and reflection must finish him.—Locke.

## CALIFORNIA FIG SYRUP CO.

### They Were "Ulys" and "Mrs. G."

Mrs. Grant had no secretary to attend to her correspondence, the great bulk of which was referred to the office for action. She used to receive an enormous number of appeals for help, for charities, for assistance, in aid of almost every cause that could be imagined. Being a warm-hearted, sympathetic woman, some of these appeals made a strong impression upon her. I can remember several instances when Mrs. Grant requested her husband to give this person or that a position that was asked for, or to accede to some other request of like nature. She always called the president "Ulys," and excepting upon the most formal occasions, he always addressed her as Mrs. G. Both the president and his wife were plain people, simple in their tastes to an extent that would cause surprise today, when everything has so changed throughout the social fabric of the entire nation.—W. H. Cook in "Memories of the White House."

### Free to Our Readers

Write Murine Eye Remedy Co., Chicago, for 48-page illustrated Eye Book Free. Write about Your Eye Trouble and they will advise as to the Proper Application of the Murine Eye Remedies in Your Special Case. Your Druggist will tell you that Murine Relieves Sore Eyes, Strengthens Weak Eyes, Doesn't Smart, Soothes Eye Pain, and sells for 50c. Try it in Your Eyes and in Baby's Eyes for Scaly Eyelids and Granulation.

### Gallery of Old Roman Villa.

A subterranean gallery filled with ancient statues still standing on their original pedestals was the startling and interesting discovery accidentally made a few days ago at Genzano, near Lake Nemi, Italy. The gallery is partially choked with loose earth and rubbish and the statues have not yet been identified. Evidently the gallery belonged to a Roman villa or a temple.

### Only One "BROMO QUININE"

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the World over to Cure a Cold in One Day. 25c.

### Dream of an Artist.

I mean by a picture, a beautiful, romantic dream of something that never was, never will be—in a light better than ever shone—in a land no one can define or remember, only desire—and the forms divinely beautiful—then I wake up with the waking of Byrnhild.—Burne-Jones.

### His Last Request.

Two men were to be hanged for horsestealing. The place selected was the middle of a trestle bridge spanning a river. The rope was not securely tied on the first victim to be dropped, and the knot slipped; the man fell into the river and immediately swam for the shore. As they were adjusting the rope on the second he remarked: "Say, will ye be sure and tie that good and tight, 'cause I can't swim."

If you use Eye Salve use the best. PETTIT'S EYE SALVE is the standard, is reliable and costs no more than inferior goods that are unknown. Used by Physicians and Oculists, helps where all others fail. It is not the TUBE or BOX that cures, it is the SALVE that does the work. Guaranteed by Howard Bros. under the Government Food and Drug Act. Don't be deceived or misled. The only really antiseptic Eye Salve that has been in the market for years. Sold by Druggists throughout the known world.

### Feminine Weakness.

A very homely clergyman was severely battered in a railroad wreck, in which he suffered the loss of a foot. One day soon after he took unto himself a wife, a beautiful woman, the ill-used minister met an old friend on the street, who banteringly asked how in the world such a pretty girl came to marry him. "Oh, ladies like remnants," was the cheerful reply.

### San Francisco, Jan. 8.—Mr. F. O. Gardiner, Secretary Heald's Business Colleges, has just returned from a visit to the Heald Schools in Stockton, Chico, Reno and Oakland, where he says business conditions seem good. The Heald Colleges at these places are all in a healthy condition, and they report that the business public call for more good stenographers and bookkeepers than they can supply. These schools are very careful, however, to recommend only those students who are well qualified to do satisfactory work.

### The Impassive Talleyrand.

Talleyrand's face was so impassive that it is impossible to interpret it. Lannes and Murat used to say of him jokingly that if, while he was speaking with you, somebody kicked him from behind, his face would show nothing.—Napoleon (Quoted in "The Corsican").

### He Needed One.

She—"Jack has a strong face." He—"It has to be. You should see his wife."—Fort Worth Record.

## California For the Sportsman

The latest publication of the Southern Pacific Company, is pronounced by hunting and fishing experts to be the most thorough booklet yet published on the fish and game of this great state. It is not an advertisement. It is a descriptive booklet of the best places in California to hunt and to fish. The expert data is furnished by Al M. Cumming, a true, practical and perhaps the best known sportsman in this state. It is the result of personal experience and observation extending over a period of more than thirty-five years. Part one is devoted to fish.

Part two is devoted to the game birds of California. The open and closed seasons are carefully explained.  
Part three is given over to the furred animals. Those sportsmen who prefer to stalk their game and who would decorate their homes with large bear rugs and huge antlers will find this section most interesting. Then it tells how to preserve your game after it has been bagged, how to ship it and how to reach these nirvodic paradises. The illustrations are profuse.

### GUMPTION ON THE FARM

The thing that uses a man up and makes him old before his time is to stop work and turn into a first-class loafer. Some folks sell out and move every time they get into a tight place. That is jumping out of the frying-pan into the fire.

Good warm clothing is a capital way to save doctor's bills. See that the wife has her share. A warm coat will last for many years.

When your husband wants a hammer in the house, just take him yours. He will bring you home a better one the next time he goes to town, see if he doesn't.

When the producer and consumer are one man, then, indeed, the distance between them is reduced to a minimum. Raise everything possible for your own use on your own farm.

Winter eggs and exercise go together.

## TAXES 1911

OFFICE OF THE TAX COLLECTOR  
COUNTY OF SANTA CLARA, CALIFORNIA.  
San Jose, California, October 5, 1911.

Notice is hereby given that the taxes for the year 1911 will become due and payable October 10th.  
First installment. Taxes on all personal property, a lien on or secured by land, all special taxes, and one-half of the taxes on all real property are delinquent on November 27, 1911, at 6 o'clock P. M., when 15 per cent. will be added to all of said first installment remaining unpaid.

Second installment. The remaining one-half of taxes on all real property will be due and payable January 2, 1912, and delinquent April 22, 1912, when 5 per cent. will be added to all taxes remaining unpaid.

Taxpayers may, if they desire to do so, pay the whole tax at one payment.  
For the purpose of receiving taxes I will be in the several townships of the county as follows:

At the Bank of Campbell, in the town of Campbell, on Wednesday, October 18, 1911.

And at my office in the Hall of Justice Building, corner St. James and Market streets, San Jose, Cal., daily, Sundays and Legal Holidays excepted, from 9 A. M. to 5 P. M., and including Monday, November 27, 1911, and Monday, April 22, 1912 at 6 o'clock P. M.

The second installment of taxes is payable at my office in the Hall of Justice Building, San Jose.

WM. A. JANUARY,  
Tax Collector of Santa Clara County.

## The A. Van der Naillen School

of Practical Civil, Electrical, Mining Engineering  
Established 1884.  
Occupying the new building, formerly of the late  
engineer, on all parts of the coast, and in the  
interior, the school is the only one of its kind  
in the state, and is the only one of its kind  
in the world.

## Improvement Club Asks For Curfew Ordinance

### Members of Campbell Club Endorse Petition Sent to County Supervisors

At the recent meeting of the Campbell Improvement Club, with R. K. Thomas in the chair and C. H. Whitman, Secretary pro tem, the Chair announced the following committees:

On Membership—Chairman, A. J. Farley, Mrs. M. L. Waite, E. G. Lanz and F. O. Putman.

Committee on Addressing—Chairman, L. C. Dick; B. C. Curry, E. R. Kennedy and J. F. Wilson.

Committee on Public Improvement—Chairman, E. G. Lanz; S. G. Rodeck, Warren Shelly and J. F. Duncan.

Committee on Finance and Auditing—Chairman, R. Alison; W. V. Sturtevant, C. Berry and Dr. E. C. Owens.

At the suggestion of C. H. Whitman the club endorsed the following petition to the Board of Supervisors with the accompanying ordinance:

"To the Honorable Board of Supervisors of Santa Clara County:

"At the annual meeting of the Campbell Improvement Club, when about 100 of our citizens were present it was unanimously voted that the Board of Supervisors be requested to pass a curfew ordinance for the benefit of the unincorporated villages of the county. This request we most respectfully submit to your Honorable Body, and we herewith append some of the main features which we should like to see incorporated in the ordinance. R. K. Thomas, President; C. H. Whitman, Secretary pro tem of Campbell Improvement Club:

### Curfew Ordinance.

"Sec. 7. Be it ordained by the Supervisors of the County of Santa Clara that it shall be unlawful for any child, actually or apparently under the age of 16 years, to loiter, wander or stroll about the streets, avenues, alleys or public parks of city or village in the night season after the hour of 8 p. m. from the first of October of any year to the last day of April of the following year, and after 9 p. m. from the last day of April until the first day of the following October, unless accompanied by parent or other adult guardian having legal custody and control of such minor. A whistle or whistles which can be heard in every part of city or village, shall be blown, or a bell or bells shall be rung 15 minutes before the appointed time as a warning, which shall be called the Curfew Signal, after which all children under 16 years of age shall be required to be off the streets, except in company of parent or adult guardian.

"Sec. 2. It is hereby made unlawful for any parent, guardian or other person having legal care and custody of any child under the age of 16 years, to allow or permit any such child or ward to go or be in or upon any street, alley, park or other public places within the time prohibited in Section One of this ordinance.

"Sec. 3. Any Policeman, Constable or Peace Officer is hereby authorized to arrest any such minor violating any of the provisions of Section One of this ordinance, and for the first violation to take such child to his home and notify his parents or guardian of such violations and penalty if again arrested; upon any subsequent violation of this ordinance said parents or guardian shall be fined not less than \$2 nor more than \$25, and if said minor cannot be controlled he shall be placed in some reformatory institution of this city or State.

"This ordinance shall be useless without the signal."

By order of the club the Secretary was instructed to issue credentials to Judge A. G. Williams, as a delegate from this club to the County Convention to be held in Los Angeles beginning January 14.

The Rev. J. F. Wilson extended the thanks of the Methodist Church to the Campbell Improvement Club for its generous gift, through its Park Committee consisting of R. K. Thomas and C. Barry, of four fan palm trees taken from the ground of the public park. Mr. Wilson also thanked the Library Association for the benefit of the several clubs meeting in the Library in the Library building, the heater which was formerly in the Methodist Church.

**Gipsy Smith**  
The meetings during the first week and to continue for the next two weeks are of extreme interest not only to our San Francisco but to the entire State. They are being held each evening at 7:30 in the Pavilion Rink, corner of Pierce and Sutter Streets; also at the noon hour from 12 to 1 at the Congregational Church, corner of Mason and Post Streets. Thus far the attendance has been excellent and is growing daily. As you may have noticed the daily press of the city has been giving wide currency to the reports of these meetings. The Gipsy is a modern wonder. He is doing our pastors and churches immense good. He is sure to reach and help the city in a large way. He is ably assisted by Professor B. P. Stout, who leads our music. Professor Stout's singing is gospel in its matter and intensely spiritual in its manner. Already scores have been led to accept Jesus Christ as their personal Saviour. Not in twenty-five years has San Francisco had such a spiritual awakening.

### THE POULTRY YARD

Late-hatched pullets will come in profit in a month or so.

You want water not quite 200° hot to scald chicks just right.

A man need not be an expert to begin poultry culture, but he needs to be more or less expert to succeed.

Many dealers object to eggs with pale yolks. When you find yours are getting that way, put a little more corn in the ration.

Eggs overwashed in water lose the beautiful fresh appearance they have when first laid. Add a bit of vinegar to the water and use as little water as possible.

There are many days in this month when it is unfit for fowls to be outdoors. For that reason they should be supplied with a good-sized house, and the floor heavily littered so they may exercise and keep in good health. The premises must be kept perfectly clean. Filthy quarters breed disease, and diseased poultry is not profitable.

Something queer about hens and even chicks turning cannibals and eating each other up alive. The best explanation so far is that birds that do this need more meat to eat. A bit of a scratch comes on some hen, and the rest see the red spot or the drop of blood, and out of curiosity pick it off. That gives them a taste of the blood, and at it they go to devour the poor creature. If plenty of meat scraps is given the chances are that you never will have any trouble of this kind.

Judge not a hen by her beauty, but by the way she does her duty.

You may feed all the food your hens can possibly use, but if you are short of grit, the results will not be satisfactory.

State of Ohio, City of Toledo, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.  
FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1886.

(SEAL) A. W. GLEASON,  
Notary Public.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials free.
